Machine Learning Final Paper
Attention-Enhanced ResNet34 with Transfer Learning for Brain Tumor MRI Classification

Group 7

4th year, IP EECS, 111504006
4th year, IP EECS, 111504513
4th year, IP EECS, 111504514

Individual Section:

1. Reflections on Project Development

在製作此 project 之前，我已經有自學過影像辨識的課程了，也有實做出成品，這次的 project 算是以前的知識複習，但這次活動也學到了很多新的東西，例如說模型架構 Skip connection、Residual block、CBAM module 等等。我也學到或複習許多資料處理的方式如 Dataloader、Augumention 的方法。有了這些實作經驗，讓我對 AI 專題有更深的認識。我期望自己可以，修習相關的課程，更精進我打造專案的能力，更能在職場上使用這些知識。

2. Team Members and Task Allocation (Indicate Contribution Proportions)

- Each team member should write their own task description, including the proportion of their contribution.

Name	Student ID	Job Description	Contribution Ratio
陳至恆	111504006	Topic Determination; Model architecture Design; Slide Preparation; Video Recording.	30%
魏振嵐	111504513	Dataset Selection; Code implementation; Model Experimentation; Slide Modification; Paper Writing.	40%
施鈞閎	111504514	Model Architecture Design; Slide Preparation; Video Recording.	30%
